

Prime8

Standard & High Capacity Pleated Air Filters

FEATURES

- MERV 8A - medium efficiency
- Extended surface
- High dust holding capacity
- Wire supported mechanical media
- Moisture resistant beverage board frame
- Available in 1", 2" & 4"
- Max operating temp: 180°F
- UL 900 Classified

PRIME8 STANDARD & HIGH CAPACITY CONSTRUCTION & APPLICATIONS

The Prime8 is an extended surface pleated air filter, designed to provide high efficiency, high dust holding capacity and low pressure drop. The Prime8 is available in standard capacity as well as high capacity (Prime8HC). As an extended-surface air filter, the Prime8, performs at superior levels in comparison to standard pleated filters. The Prime8 has a MERV 8A rating per ASHRAE Test Standards 52.2 - Appendix J. The Prime8 is also ANSI/UL 900 Classified.

The Prime8's rating of MERV 8A makes it the perfect upgrade from our Select Series panel filters as well as standard MERV 6 and MERV 7 pleated filters as the media allows the efficiency to maintain its MERV 8A rating during the filter's life.

The Prime8 has a durable, moisture resistant, beverage board frame with wire supported media. The Prime8's media is a mechanical blend of synthetic fibers that is designed for use specifically in extended surface pleated filters. Our Prime8 mechanical media means that these filters are highly efficient, have a high dust holding capacity and a low pressure drop.

The Prime8 should be used anywhere a higher level of indoor air quality is required. Applications that would benefit from the Prime8 pleated air filter include schools, hotels, commercial office buildings, hospitals, pharmaceutical plants, laboratories, and other facilities where pressure drop determines filter change-out schedule

TECHNICAL DATA

- Notes:
- 2" & 4" deep filters are rated at 500 fpm and 1" deep filters are rated at 300 fpm.
 - Performance data is based on ASHRAE Test Standards 52.2 - Appendix J-2017.
 - More sizes are available. Please contact customer service for a full list of sizes.
